

Node

```
graph BT; SB[synch_node.synch_block.Synch Block] --> N[Node];
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Node'. Below it is a larger box labeled 'synch_node.synch_block.Synch Block'. A blue arrow points from the 'synch_node.synch_block.Synch Block' box up to the 'Node' box, indicating that the former inherits from the latter.
